

Software Registration Guide

Thank you for your purchase. Now it's time for registering your product. Please make sure that you have installed the latest version of the software. To do this, you first need to uninstall your current trial version of the software. Please click **Start > Control Panel > Add or remove programs** and click on **Remove** button on the corresponding item on the list:

Then, please download the latest versions of your software at:

When you installed the latest version, please run the software. The following dialog appears:

- 1- Please enter your full name and valid email address in this form.
- 2- Then click on the  Register tab.

We need your computer **HardwareID** (green phrase in this picture) for next step:

- 1- Please email your HardwareID to support@novotechsoftware.com along with your receipt of payment.
- 2- We will generate the Activation Key based on your own HardwareID and send it to you by email.
- 3- When you received your Activation Key, please come back to this page and enter it in the textbox labeled "Activation Key".
- 4- Make sure you are connected to internet, for Key verification.
- 5- Then press Register button and wait until you receive success response from our web server.
- 6- Exit the program and re-run the software.

Congratulations!

Your software is now full version on this computer and this dialog will never appear again. Please do not hesitate to contact us at support@novotechsoftware.com should you have any questions or need more assistance.
